# WHO WE ARE, WHAT WE DO AND COMPANY HISTORY

**MEMBREY'S IS HIGHLY EXPERIENCED IN COMPLICATED CRANAGE AND  
TRANSPORT SERVICES WITH AN EXTENSIVE RANGE OF EQUIPMENT  
- WE GO THE EXTRA MILE TO GET THE JOB DONE!**

Established in 1962 as J & N Membrey & Son, our business retains its strong heritage and reputation today, due to a dynamic and customer-centric focused team that has the technical expertise to service any transportation or lifting requirement.

We evolved to become Membrey's Transport & Crane Hire after Craig Membrey took over the family business in 1989, however the core values

of the company remain: Foster strong customer relationships, provide exceptional service with an outstanding product range and technical excellence.

Operating across Australia, 24 hours a day, 7 days a week, we have evolved into one of the most trusted haulage and crane companies in Victoria and Australia-wide.

## WHY MEMBREY'S?

We offer trailers to suit a broad range of applications and provide a wide selection of heavy haulage solutions that you cannot find from other companies. We bring you peace of mind knowing your job will be completed on time, within budget and with the utmost care and dedication.

Thanks to our array of services within the Transport and Crane hire industry and our passion for modern transportation, we have acquired an extensive list of trusted long-term clients within Australia, who continually return to experience our transport solutions.

No task is too complex and with our highly experienced crane crew and transport operators, alongside our friendly staff and extensive product range we have the winning formula to provide solutions for any transportation or lifting need.

## PROJECTS OVERVIEW

- Mammoet
- Lincon Hire
- John Holland
- LinFox
- APA Group
- Cleanaway
- Jaydo Construction
- Rail WPA Alliance

# SERVICES OVERVIEW

## CRANE HIRE

Fast and reliable crane hire solutions to meet any project requirement, including:

- Mobile cranes: for the heavy lifts
- Franna cranes: for versatility and performance
- City cranes: for those tighter spaces
- Mini cranes: for smaller spaces

We also make heavy duty jobs easier by offering transportation with our specifically designed crane trucks, which are convenient and versatile because every lifting and moving project is unique!

## ENGINEERED LIFT STUDIES

We offer crane lift assessments to ensure that our clients understand the lifting process and are aware of all lifting requirements. Our engineered crane lift studies eliminate costs, prevent project delays and avert risks for your lifting projects.

## HEAVY HAULAGE AND OVERSIZE

Don't settle for one-size fits all approach, we have a range of oversized hauling and machinery transport solutions with our fleet of trucks, including a comprehensive range of trailers. Our heavy haulage division is constantly expanding to provide the widest range of solutions to meet your transportation needs.

## TRANSPORT SERVICES

For local or interstate machinery transport you can rely on Membrey's! Having perfected the art of transporting loads safely and effectively, we offer a huge range of equipment carriers/trailers catering for your specific moving needs.

## SALVAGE & RECOVERY

With a dedicated range of equipment and experienced staff, Membrey's are there to ensure your recovery job is completed safely and with minimal disruption to your operations.

## ACCESS EQUIPMENT

For when you need extra access we can provide a range of equipment, including boomlifts, telehandlers and scissor lifts plus a range of electric and diesel options.

## PILOT VEHICLES

For oversized or over dimensional projects, we can also provide pilot or escort vehicles to accompany the transport. The benefits of hiring through us includes:

- 24/7 national support
- An accredited escort driver can be provided
- Vehicles fitted with the latest technology and safety equipment.

## FORKLIFT HIRE

Forklift services are another key component of our Handling offering for lifting unusual loads and a more economical way of moving cargo off trucks. The benefits of hiring through us includes:

- Short term or long term hire availability
- Capacity to lift 5 to 16 tonne of load
- Hire with or without an experienced operator
- Customised solutions with our wide range of forklift accessories.

## OUR PEOPLE

- Engineers
- Riggers
- Dogmen
- Crane Operators
- Transport Operators
- Qualified Mechanics
- Boilermakers

All of our operational staff are certified and trained to the highest standards.

## TECHNOLOGY

Membrey's employ a state-of-the-art business-wide software system that ensures everyone in the company has immediate access to the same data and resources. Utilising the latest technology allows us to quote, manage and allocate individual jobs & project information directly to our operators in real time via tablets. Together with live GPS Telematics on all our trucks and cranes, this ensures we can manage every stage of your project seamlessly, safely and cost-effectively.

***"We continue to invest in our systems, people and company so we can provide the very best services to you."***

# SALVAGE & RECOVERY

WITH A DEDICATED RANGE OF EQUIPMENT AND EXPERIENCED STAFF, MEMBREY'S CAN PROVIDE A TOTAL RECOVERY SOLUTION. ENSURING A SAFE RECOVERY WITH MINIMAL DISRUPTION TO YOUR OPERATIONS.

## RECOVERY TRUCK

This vehicle is a key investment in providing the broadest range of services to our clients when it counts the most.

- 24-hour heavy recovery & salvage
- Off-road recovery (machinery)
- Fully equipped to suit small to large scale recoveries
- Works in conjunction with our other assets

## RESOURCES

Understanding the dynamics of each recovery including the environment, use of correct assets and resources are critical in achieving a safe & successful salvage.

- Bog Mats
- Lifting Jibs
- Spreader Bars
- Steel Plates
- Telehandler & Excavator

## SUPERTILT

This unit is capable of an impressive array of transport applications from portable homes, large machinery, to trucks & buses. A 33-tonne capacity trailer with triple winches on a 13.8-metre-long deck that can adjust out to 3.5 metres wide also makes it an ideal recovery vehicle.

# HEAVY HAULAGE & MACHINERY TRANSPORT

## EXTENDABLE & STEERABLE TRAILERS

Shipments vary in size or length. Your average truck trailer of 12 metres long may not be able to accommodate longer materials & loads. For this reason, using extendable trailers is a must. With the ability to extend up to 44 metres long, our purpose-built trailers can haul bridges, long steel beams or wind farm equipment.

## VESSEL CARRIER AND TANK TRAILER

We can customise our heavy-duty trailers to accommodate high loads and vessels. Our vessel carriers can effectively move your large cargo by carrying it low to the ground.

## B-DOUBLE TRAILER

Our B-Double Trailers are ideal for transporting large, long, wide or awkwardly shaped freight. More freight can be transported as the combination of trailers are approximately 20 metres in length. A B-Double can carry more and provide smoother gear handling due to its 'air ride' suspension feature.

## PLATFORM TRAILERS & LOW LOADERS

Suitable for heavy loads up to 130 tonnes and extendable in width and length, platform trailers are specifically used for the relocation of trams, trains, cranes, earthmoving machinery and general oversized machinery.

## MODIFIABLE PURPOSE BUILT TRAILERS

Membrey's welcomes customised heavy haulage transport requirements. For several years, we have been building modifiable purpose-built trailers that provide the maximum capacity & versatility to meet our clients' needs.

## FLAT TOP SEMI-TRAILER

Membrey's Flat Top Semi-Trailers vary from 12 to 14.5 meters long. This makes them ideal to transport large, long, wide or awkwardly shaped freight.

## DOLLYS AND JINKERS

Dollys and jinkers are types of trailer extensions connected to a prime mover vehicle. Both types of equipment are often used together to maximise weight-lifting capacity, ranging up to 60 tonnes. Thanks to our qualified drivers, our large vessel carriers can be safely steered from the rear to navigate tight corners and environments.

## SIDELOADER

The Extendable Sideloaders are highly recognised for their speed and productivity in point-to-point transport. What sets it apart is the range of containers that it can accommodate - from small 20-foot units all the way up to 48-foot units and everything in between.

## RENTAL DIVISION - TRAILER HIRE

Short and long term hire available. Flat Tops, Drop Decks with and without ramps.

# TRANSPORT SERVICES

## HEAVY HAULAGE AND OVERSIZE TRANSPORT SERVICES

Our heavy haulage division is constantly expanding as we include more solutions into our fleet to deliver the broadest range of services to our clients.

## PILOT CARS

When you're searching for an escort or pilot vehicle to accompany your oversized transport loads, Membrey's is the place to turn. We have options available for all state requirements and all types of jobs.

## CRANE TRUCKS

Our crane trucks are an ideal solution when you need to load, transport and unload efficiently. From general equipment & machinery and capacities up to 12 tonnes. These trucks are a great and economical transport solution.

## SEMI TRAILERS AND DROP DECKS

Flat top semi-trailers vary from 12 to 14.5 metres long. This makes them ideal to transport large, long, wide or awkwardly shaped freight.

## TILT TRAY TRUCKS

Tilt tray trucks are customised configurations of large tray trucks topped with a specialised flat platform which can be tilted for manageable use. These are often used to carry and move excavators, rollers, tractors and 20ft containers.

## TRAFFIC MANAGEMENT

Our traffic management and control solutions ensure that all road worksites are carefully planned out, ensuring optimum safety and minimal disruption to traffic. Our attentive team has procedures and processes in place including drawing detailed plans of the area, facilitating traffic control devices and obtaining all relevant permits required.

## TRAY TRUCKS

Tray trucks are small to medium-sized trucks often with drop side rails for loading ease. These are generally used in business delivery projects, warehousing, steel transportation and transportation of structural items. These trucks have a carrying capacity that ranges from 1.7 to 9 tonnes and are up to 7 metres in length.

## HOT SHOTS / NON-STOP URGENT DELIVERY

We're unique when it comes to your urgent transportation needs. Our direct / non-stop offering is perfect for clients who need immediate delivery. This service is operated by two or more drivers; If you have an urgent freight need, this is the best transport service for you.

## CRANE SEMI

The next level in load transport and unloading. Our crane semi is designed for those bigger jobs. Capable of towing a variety of transport trailers. Matched with an impressive maximum capacity of 22 tonnes.

# CRANE HIRE

OUR EXTENSIVE, CERTIFIED & MODERN FLEET COUPLED WITH OUR BROAD RANGE OF LIFTING EQUIPMENT MEANS WE CAN PROVIDE OUR CLIENTS WITH THE WIDEST RANGE OF SERVICES POSSIBLE.

## MINI CRANES

Our mini cranes are versatile crawlers that can be conveniently used in cramped or tight spaces due to their relatively small size. They also have a small swing radius, which makes them a more practical choice for tight spots, building sites and project constructions conducted on roads or pavements.

## KATO13/BUBBLE CRANE/CITY CRANE

Though the Kato is a compact crane, its lifting performance is commendable in small spaces. For lighter lifts, Kato 13t can easily move building materials, air conditioners, furniture and much more!

## FRANNA CRANES

Franna is a popular brand of pick and carry crane that dominates the Australian crane hire and transport industry because of their versatility and proven track record of delivering powerful performance on any commercial site.

## MOBILE CRANES

Mobile cranes are highly regarded for their versatility as they can be driven to the location. Mobile Cranes have the ability to lift heavier loads and offer extended reach.

## WHY PARTNER WITH MEMBREY'S?

Available 24 hours a day,  
7 days a week

Experienced and professional  
operators

Interstate transport and heavy  
haulage transport

Proven track record  
of success

Management of all authority  
requirements including pilot  
vehicles and state permits

## FRANNA CRANES

**FRANNA IS A BRAND OF PICK AND CARRY CRANES THAT DOMINATE AUSTRALIAN CRANE HIRE BECAUSE OF THEIR VERSATILITY AND PROVEN TRACK RECORD OF DELIVERING POWERFUL PERFORMANCE IN COMMERCIAL SITES.**

### FRANNA 12T

The Franna 12T Crane has a max. lifting capacity of 12 tonne that has been well established in the building industry for many years. Its compact size and 12t @ 1.53m working capacity radius makes it suitable for all types of worksites that require a fast and efficient machine to handle those hard to reach jobs.

### FRANNA AT22

Franna AT22 can carry heavier loads of up to 22 tonnes and has a working capacity radius of 22t @ 1.4m. Plus, due to its agility and compact frame, it makes it very effective for quickly carrying cargo loads to their destination.

### FRANNA MAC 25/SUPERLIFT

Franna Mac 25 is a pick and carry crane with a lifting capacity of 25 tonnes, and excellent ease of placement. It's a flexible lifting machine offering versatility in tight places, with excellent ease of placement. Perfect for machinery relocation. The Superlift kit works together with the existing MAC 25 counterweight, resulting in an increase to the rated capacity of the machine by up to 30% in some configurations.

### AT40

The AT40 offers the latest in pick + carry engineering and technology. Boasting a 44% larger load capacity than the MAC 25, the mighty AT40 pick and carry crane has a maximum lifting capacity of 40 tonne. The articulated 3-axle design of the AT40 gives it a similar turning circle to the MAC 25.

### WHY PARTNER WITH MEMBREY'S?

Available 24 hours a day,  
7 days a week

Experienced and professional  
operators

Interstate transport and heavy  
haulage transport

Proven track record  
of success

Management of all authority  
requirements including pilot  
vehicles and state permits

# MOBILE CRANES

**MOBILE CRANES ARE HIGHLY REGARDED FOR THEIR MOBILITY AS THEY CAN BE DRIVEN TO THE LOCATION. THEY HAVE THE ABILITY TO LIFT HEAVIER LOADS AND OFFER EXTENDED REACH.**

## LIEBHERR LTM 1040

The Liebherr LTM 1040 is flexible yet powerful, providing a maximum lifting capacity of 40 tonne. This extendable telescopic boom can quickly be adjusted to provide additional reach. The all-terrain chassis make this machine ideal for use on public roads & off-road. Featuring excellent safety, economy and comfort.

## LIEBHERR LTM 1055

The 3-axle Liebherr LTM1055 offers the next level of load capacity at 55 tonnes. A cost-effective machine that can quickly be ready for use thanks to innovative fully automated technology.

## LIEBHERR LTR 1220

Our LTR 1220 crawler crane combines the features of a telescopic crane with those of a crawler crane – the crawler travel gear provides outstanding off-road manoeuvrability with excellent handling. The advantages of a telescopic crane include its short set-up times, simpler transport and the variability of its boom system.

## LIEBHERR LTM 1100

The 4-axle Liebherr LTM1100 delivers great safety and economy as well as exceptional load capacities and is rated to lift 100 tonne. The addition of lattice mast sections and a double folding jib allow the long, extendable telescopic boom to be further deployed.

## LIEBHERR LTM 1130

Liebherr LTM1130 is all terrain, compact mobile crane with a lifting capacity of 130 tonnes. With its smart design & layout, it can be easily manoeuvred.

## LIEBHERR LTM 1250

The 5-axle Liebherr LTM1250 has a game changing lifting capacity of 250 tonne. It has a large ballast radius and can be fitted with a fixed jib or multi-functional folding jib.

## LIEBHERR LTM 1350

The 6-axle Liebherr LTM1350 has outstanding boom lengths and load rating, with a maximum lifting capacity of 350 tonne. Variable configurations make this a truly valuable machine capable of a variety of multi-role projects.

## MINI CRANES

MINI CRANES ARE VERSATILE CRAWLER MACHINES IDEAL FOR USE IN TIGHT SPOTS, SUCH AS BUILDING SITES AND PROJECT CONSTRUCTIONS CONDUCTED ON ROADS OR PAVEMENTS.

### MAEDA MINI CRANE MC285C / MC305

Maeda Crawler Cranes have the ability to lift in small, hard to reach spaces due to their compact working footprint and minimal tail swing. The MC285C crane is an efficient machine with a max. crane capacity of 2.8t x 1.4m and a max. working radius of 8.205m @ 0.15t. The MC305 is a reliable machine with a max. crane capacity of 2.98t x 2.5m and a max. working radius of 12.16m @ 0.26t.

## ALL TERRAIN

### TELEHANDLERS

Telehandlers are suitable for lifting a few tonnes to and from those hard to reach spots. Somewhat resembling a forklift, our telehandlers feature a telescopic boom which allows them to reach heights and operate on terrains that forklifts cannot.

### WHY PARTNER WITH MEMBREY'S?

Available 24 hours a day,  
7 days a week

Experienced and professional  
operators

Interstate transport and heavy  
haulage transport

Proven track record  
of success

Management of all authority  
requirements including pilot  
vehicles and state permits

# ACCESS EQUIPMENT & FORKLIFT HIRE

## BOOMLIFTS

Both articulating boom lifts and telescopic boom lifts can tackle tough jobs. A telescopic boom lets you reach farther with more capacity, putting you right where you need to be as simply and efficiently as possible. But, if the job requires you to get up and over objects, an articulating boom lift offers greater flexibility.

## SCISSOR LIFTS

Scissor lifts can provide large, stable working platforms at great heights - ideal for installations and maintenance. Increased lift capacities and larger platforms with more work space.

## FORKLIFTS

As our crane hire and transport business continue to expand, offering forklift services has become a no brainer due to its vital function in lifting unusual loads. They can assist in the mobility of machinery. Forklifts are an economical way of moving cargo off trucks with metal forks installed at the front of the vehicle for lifting.

## LIGHTING TOWERS

We provide a diverse range of night-lighting solutions to suit your needs. From small lighting stands to LED lighting towers, we can provide the perfect solution to illuminate any surroundings. These towers are adjustable, quick to set up and can be used in industries like construction, transport infrastructure, mining and roadworks, just to name a few.

## EXCAVATORS

The Caterpillar 305E2 CR provides big performances in a mini excavator. It delivers high performance and economy in a compact design

ARTICLE FROM CRANES AND LIFTING MAGAZINE

# MEMBREY'S CONTINUES TO CELEBRATE 60TH BIRTHDAY

**Membrey's Transport and Crane Hire celebrates its 60th birthday with the arrival of a new Franna AT40, the third in the fleet.**

**MEMBREY'S TRANSPORT AND CRANE HIRE** celebrated its 60th birthday with the arrival of a new Franna AT40 in Melbourne and the opening of a new branch facility at Crestmead in Logan, west of Brisbane.

The new Terex Franna AT40 articulated pick and carry crane is a true workhorse for any construction site, featuring a huge maximum lift capacity of 40t, and boasting 44 per cent more load moment than the MAC 25.

The AT 40 features a three-axle design that eliminates the need for a removable counterweight. The third axle control system also raises axle three when operating on a work site, providing a similar turning circle as the MAC 25. Maximum road speeds of up to 75km/h allows the operator to move swiftly and safely from job to job.

Additional features include a full width isolated cabin, articulating counterweight, and increased cabin storage

The AT40 also comes with Franna's Dynamic Load Moment Indication (LMI) system. First released in 2013, Dynamic LMI remains a pillar of safety, underpinning the electronic control and user experience offered today. The system is designed to offer 'real-time' calculation of rated capacity, taking into account boom configuration as well as chassis articulation, pitch, and roll, enabling continual assessment of structural limitations, forward stability, and side stability.

Not only that, the increased resolution of rated capacity the crane enjoys is made possible by finer measurement of articulation pitch and roll angles, allowing for improved machine capability compared to previous generation LMI systems. When operated on a jobsite over undulating terrain, the rated capacity will be updated continually, providing instantaneous information on the percentage utilisation of the machine (0-100 per cent of available capacity).

When the crane is operating on a side slope or undulating terrain, operators are no longer required to manually calculate a reduction of rated capacity; the Franna Dynamic

*The new Franna AT 40 is the third in the Membrey's fleet.*

LMI does that. The crane also comes with operator-settable maximum working height, a maximum working radius, and a percentage of rated capacity. These features further enhance the safe operation of the machine when site conditions get tough and are available in retrofit form for all Mercedes-powered Franna cranes.

Membrey's transport and crane fleet is impressive by any standards and the AT40 will no doubt be an excellent addition. Membrey's managing director Craig Membrey provides more detail.

"We continue to invest heavily in our fleet and the last 18 months has seen the business invest in four new Frannas, two additional Maeda mini crawlers, several new trucks including trays and heavy rated vehicles, along with several new JLG boom lifts, light towers, scissors lifts, telehandlers, and forklifts," he said.

"Membrey's approach to the equipment we operate has always been about 'Best of Breed' and 'Brand Loyalty'. To that end, our fleet of articulated pick and carry cranes are Terex Frannas and our all terrains are Liebherr and, of course, our heavy haulage fleet is Kenworth," he said.

Membrey's operates eight all terrains with capacities ranging from 40t up to the Liebherr LTM 1350 -6.1 with a 350t capacity. There are 12 Frannas in the fleet ranging from 12t to 40t capacities, including three AT 40s. The fleet also includes a Kato MR 13t capacity city crane. 'The Beast', the recently arrived Liebherr LTR 1220, adds a completely new dynamic to the fleet. The move into Brisbane has been some time in the planning and Membrey is excited about the possibilities.

"We have a lot happening within the business and we've been looking to diversify and expand our operations for some time. We are experts in end-to-end transport and logistics solutions, including craneage, and many of our customers in Victoria operate up and down the east coast.

"The move to Brisbane reflects the changing needs of our clients and the projects they are managing. As borders become less relevant and with renewed focus on experience and professionalism, Membrey's capabilities set the standard our clients expect," he said.

"Initially we'll have a focus on some of our specialty trailers to support current opportunities and this will be quickly expanded to respond to customer and project needs. To start with, we will base a couple of Frannas there to support current activities, and on the transport front it will be what Membrey's is best known for. Bigger is better and this will include support vehicles.

Membrey's  
managing director

"We recently signed a lease on a yard in Crestmead in the west of Brisbane and there's a lot of development happening in the region. The move gives us a solid foot hold in south east Queensland and we are very excited at the prospect of servicing existing and new clients with our 'make it happen' approach throughout the region," said Membrey.

Membrey's general manager, Leigh Canet speaks about the importance of the Terex Franna relationship and the benefits Membrey's enjoy well beyond the standard supplier/customer model which he largely attributes to Terex's customer-centric approach they instil within the business and customers.

"The industry leading benefits of Terex are underpinned by strong relationships with their customers and industry. At a time when we all face challenges with parts, supply chains, staffing and the broader costs associated with today's markets having strong & reliable trusted relationships to support our business is absolutely invaluable," he said.

---

***"Membrey's transport and crane fleet is impressive by any standards and the AT40 will no doubt be an excellent addition."***

---

*Membrey's now services Melbourne, Brisbane and the Gold Coast.*
